# Sheddies' Chatter

### Bookbinding Lumbecks Made

Another challenge for engineers Norm and Geoff who have been busy with the new milling machine, setting it up to make a series of lumbecks which are used by bookbinders to form the curved spine of hard-backed books.

### Excess Machinery

A reminder that we have quite a few items of machinery etc which are surplus to requirements. These are to be sold on Trademe - which will free up some room in the Shed for workspace.

Members have "first choice" of purchase prior to listing, so if you are interested be quick and talk to Chairman Ross or Shed Supervisor Gavin as soon as possible.

### Community Projects

Don't forget that there are always new projects coming on stream so if you do not have a "personal" project just ask Workshop Supervisor Gavin and he will discuss the community projects that you may like to be involved with. There is always something for everyone regardless of your skills.

### Dust Filters Installed

Thanks to the loan of some scaffolding from Norm, Gavin and the boys were able to install our new dust filters with a minimum of effort.

### Thank you St John

Many thanks go to St John for their prompt response to our call for assistance when one of our members was taken ill. They had time for a quick look around the Shed and were very impressed—we may have a couple of new members. The member is now back at the Shed after a very short spell in NS Hospital.

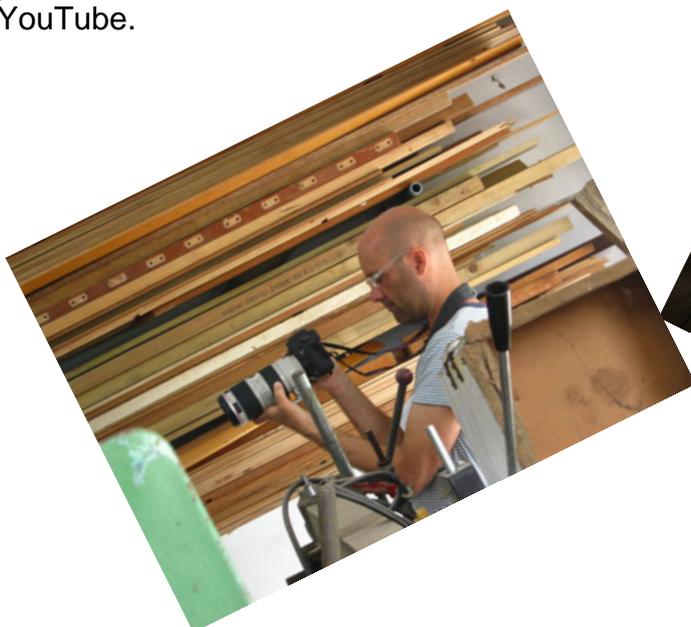

### Toy Maker at Work

Members have begun making wooden toys for charity. Winston applies some finishing touches to the carts he has been making. One of these along with a large box of Golf Balls has been donated to North Harbour Rotary Club for their forthcoming Auction at Eden Park. Opportunities for members to be involved are welcome just talk to one of the Trustees and they will guide you in the right direction.

### Shed Photos

Professional photographer Tom Robertson came into the Shed to take some pictures of the boys at work for his portfolio, and will provide copies to the Shed for future publicity publications. Tom will be in from time to time - any members who do not wish to have their photograph taken are welcome to advise Tom of this. There is also a possibility of a video being produced to be added to our website and YouTube.

### New Equipment arrives

Our large donation from the Birkenhead Licensing Trust has enable us to purchase four more pieces of equipment, a 20" Bandsaw, Spindle Moulder, Oscillating Bobbin Sander and an a Dust extractor which will be used between the two Radial arm saws.

Geoff checks delivery

Gwynn and Chairman Ross set up the Bandsaw.

# Snoopy Departs

After almost six months work Snoopy left the Shed on Wednesday 13th November to be taken to the storage facility ready for the Glenfield Santa Parade on Sunday 17th November. The project has been a great effort led by Gwynn-Lloyd Jones and many members of the Shed and they can be proud of the end result. Make sure you are at Glenfield on Saturday to see the enjoyment the Kids will get when they see Snoopy go by.

The project was taken on when we were approached by Jill Nerheny from the Kaipatiki Facilities Trust who asked if we could help.
